

First let me say I am a business owner. I am a happy xm owner. I think the main reason behind this attack on xm radio is due to the fact the radio has commercials. This is being effected and causing radio stations financial problems as there financial backing is being threatened. As well there very jobs. I happen to think that the radio people talk to much. Why do I happen to care what they say with there over gossip issues that they ramble on about. XM gives us the listeners the ability to pay to keep xm running instead of having commercials or Dj talk. On average there are about 5 to 7 minutes of commercials on a average popular fm radio station. they sell the time in order to make money. this is my mind is as bad as telemarketing. Your subject to listen to there crap because you want to here music. Why when there is xm and you can here your music. you want with out the gossip or commercials. I don't know about anyone else but when I get up in the morning the last thing I want to listen to on my drive is a bunch of gossip dj's. I find them annoying at best. Why should we the customers have to put up with this any longer. I vote with my wallet. No more fm dj gossip or long commercials why to my ear need to pay in order to listen to music variety. This is like when they came out with free internet. with the banner you could not get rid of. Lets get rid of this radio spam. xm has done just that. You law makers going to turn off gps because it has no commercials? or how about cell phones. How many distracted drivers are there on the road because they cant stand the radio gossip or commercials. This could be a cause of accidents on the road. so why not offer people a choice what they wish to listen to. Why should we as potential customers of the usa have to put up with gossip or dj talking. let them get a xm station for gossip dj talk and have there own show for those into that. most xm radio's are installed in cars. there not in houses generally. So we can enjoy our time going down the road with out some loud announcer "TODAY ONLY CAR SALE ON LALALA DEALERSHIP ON THE CORNER OF Z AND 50TH. TODAY ONLY 9AM TO 5 PM." commercial after commercial. It's no wonder that people change the radio station as they can stand it. what is more important getting rid of gossip radio and commercials or the threat of there end with Xm. I will continue to get xm. I urge you don't let am / fm radio monopolize the air waves with there dj talk and commercials just because of there loss in profit. Xm has done nothing wrong. there not Napster. So lets not make XM out to look like that. Lets instead keep them on the air waves as a good alternative to am / fm radio. I am sure many truckers on the road like xm as they are not bound to a area where they can get the station. why threaten XM radio? No one like spam. am / fm radio is full of it. So fix it.
